An examination of clean technology entrepreneurship finds that “green capitalism” is more capitalist than green. Entrepreneurs and investors in the green economy have encouraged a vision of addressing climate change with new technologies. In *Planetary Improvement*, Jesse Goldstein examines the cleantech entrepreneurial community in order to understand the limitations of environmental transformation within a capitalist system. Reporting on a series of investment pitches by cleantech entrepreneurs in New York City, Goldstein describes investor-friendly visions of incremental improvements to the industrial status quo that are hardly transformational. He explores a new “green spirit of capitalism,” a discourse of planetary improvement, that aims to “save the planet” by looking for “non-disruptive disruptions,” technologies that deliver “solutions” without changing much of what causes the underlying problems in the first place. Goldstein charts the rise of business environmentalism over the last half of the twentieth century and examines cleantech's unspoken assumptions of continuing cheap and abundant energy. Recounting the sometimes conflicting motivations of cleantech entrepreneurs and investors, he argues that the cleantech innovation ecosystem and its Schumpeterian dynamic of creative

destruction are built around attempts to control creativity by demanding that transformational aspirations give way to short-term financial concerns. As a result, capitalist imperatives capture and stifle visions of sociotechnical possibility and transformation. Finally, he calls for a green spirit that goes beyond capitalism, in which sociotechnical experimentation is able to break free from the narrow bonds and relative privilege of cleantech entrepreneurs and the investors that control their fate.

For the first time since the 1970s when the National Front became Britain's fourth largest political party, the recent electoral success of the British National Party has put Britain's extreme right back on the political map. Nigel Copsey provides a clear and comprehensive analysis of the history of the British National Party and its struggle for political legitimacy. With far-right parties enjoying unprecedented success across Europe, this book also locates its subject in the broader international context.

Iconic graphic designer and Academy Award-winning filmmaker Saul Bass (1920--1996) defined an innovative era in cinema. His title sequences for films such as Otto Preminger's *The Man with the Golden Arm* (1955) and *Anatomy of a Murder* (1959), Alfred Hitchcock's *Vertigo* (1958) and *North by Northwest* (1959), and Billy Wilder's *The Seven Year Itch* (1955) introduced the idea that opening credits could tell a story, setting the mood for the movie to follow. Bass's stylistic influence can be seen in popular Hollywood franchises from the Pink Panther to James Bond, as well as in more contemporary works such as Steven Spielberg's *Catch Me If You Can* (2002) and television's *Mad Men*. The first book to examine the life and work of this fascinating figure, *Saul Bass: Anatomy of Film Design* explores the designer's revolutionary career and his lasting impact on the entertainment and advertising industries. Jan-Christopher Horak traces Bass from his humble beginnings as a self-taught artist to his professional peak, when auteur directors like Stanley Kubrick, Robert Aldrich, and Martin Scorsese sought him as a collaborator. He also discusses how Bass incorporated aesthetic concepts borrowed from modern art in his work, presenting them in a new way that made them easily recognizable to the public. This long-overdue book sheds light on the creative process of the undisputed master of film title design -- a man whose multidimensional talents and unique ability to blend high art and commercial imperatives profoundly influenced generations of filmmakers, designers, and advertisers.

IES SAT books are designed to follow a compact format yet offer the student test taker a wealth of advice and practice material. This discipline-specific New SAT Grammar book features ten full Writing and Language practice tests, along with intensive, memorable lessons that show students how to deal with the nuances and intricacies of the New SAT. Study of essential grammar rules and practice with the most accurate, most relevant material are the essentials of success on the New 2016 SAT. Like its predecessor, the re-designed SAT tests the fundamentals of verb usage, sentence construction, comparison, and English diction. But the new test has also shifted emphasis, and shifted radically: punctuation, paragraph coordination, and uses of visual evidence will pose new challenges. It will be necessary to break bad writing habits, and to leave behind awkward or incorrect colloquial expressions, more aggressively than ever before. Precision-edited and classroom-tested you will find tips and tricks on subject-verb agreement, parallelism, redundancy, and idiomatic expressions. These tips have guided numerous IES students to success on the old SAT and are just as relevant to the new version. Yet new sections on coherence, style, and using visual resources will give you everything you need to approach the questions that are unique to the passage-based New SAT. To break the bad habits formed in everyday speech and undisciplined writing, and to truly grasp all question types on the New SAT Language and Writing, you need this book. Once you have completed the lessons, exercise your new knowledge using the ten practice tests all based on the newest released tests from the College Board itself. We at IES have confidence that you can control the New SAT.

During his reign and following his death, the physiognomy of Alexander the Great was one of the most famous in history, adorning numerous works of art. This study demonstrates how the various portraits transmit not so much a likeness of Alexander as a set of cliches that symbolized the ruler
