Aviation security Federal Air Marshal Service is addressing challenges of its expanded mission and workforce, but additional actions needed. LexisNexis

This study examines the results of U.S. assistance to the internal security forces of four repressive states: El Salvador, Uzbekistan, Afghanistan, and Pakistan. Efforts to improve the security, human rights, and accountability of security

forces appear more likely to succeed in states transitioning from repressive to democratic systems. In addition, several factors are critical for success: the duration of assistance, viability of the justice system, and support and buy-in from the local government (including key ministries).

Security jobs exist in private companies, at public venues such as sports facilities and arenas, and in government agencies. One of the appealing aspects of the security field is that it provides jobs that offer dependable salaries and good benefits for people with all levels of education. Jobs include security guards, government security agents at airports, and college-educated government agents and intelligence analysts. The field also includes a wide variety of

working environments--from one-person operations to huge corporations, and from celebrity protection and corporate security to agencies involved in international crime and terrorism prevention. In this straightforward narrative, aligned to the college and career readiness standards, high school students explore specific careers in the security field and learn about internships, networking, resumes, interview skills, and getting a first job. Among the valuable information offered are descriptions of certification tests, interviews with actual security professionals, and the pros and cons of working in the industry.

Code of Federal Regulations

Olympic Games are sold to host city populations on the basis of legacy commitments that incorporate aid for the young and the poor. Yet little is known about the realities of marginalized young people living in host cities. Do they benefit from social

housing and employment opportunities? Or do they fall victim to increased policing and evaporating social assistance? This book answers these questions through an original ethnographic study of young people living in the shadow of Vancouver 2010 and London 2012. Setting qualitative research alongside critical analysis of policy documents, bidding reports and media accounts, this study explores the tension between promises made and lived reality. Its eight chapters offer a rich and complex account of marginalized young people's experiences as they navigate the possibilities and contradictions of living in an Olympic host city. Their stories illustrate the limits to the promises made by Olympic bidding and organizing committees and raise important questions about the ethics of public funding for such mega-events. This book will be fascinating reading for anyone interested in the Olympics, sport and social exclusion, and sport and politics, as well as for those working in the fields of youth studies, social policy and urban studies.
