A black student is shot dead during a demonstration claiming "Beethoven Was Black" in Bonn's historic Münsterplatz with its majestic monument to the Bonn-born composer. Attending a Beethoven jubilee conference in the city is retired professor turned art crimes detective Megan Crespi with her American colleague and Beethoven expert, Will Meridian. During their symposium on the composer one of the participants is also killed. Who is the assassin or assassins and why do the murders continue? The cast of characters and suspects Megan is confronted with include Bettina Brentano,

ambitious conductor of the Bonn Classical Philharmonic, Oskar van der Fresser, founder of the Beethoven und Du Museum in Vienna, Dr. Seide Sammlerin, over-protective director of the Beethoven-Haus Bonn, Tobias Neidisch, Beethovenhalle night guard with a chip on his shoulder, Dr. Li Shutong, with a singular background relating to Beethoven in China, Leopold Weissknab, white supremacist student studying at Bonn University, Louis van Hoven, a self-declared direct descendant of Ludwig van Beethoven, Clemens Karl von Masuren, beloved conductor of the Beethoven Orchester Bonn, and Takuto Nisemono, conductor and composer once considered “the Beethoven of Japan,” now disgraced but defiant and scheming a come-back. Megan’s pursuit of Beethoven-related criminal activity extends to a cruise ship bound for China and additional deaths. Can justice prevail? [ABENTEUER SCHOTTLAND](#) Alan Hearnshaw

From the publishers of Motorcycle Consumer News, *Shifting Gears at 50* is a one-of-a-kind motorcycling manual for returning and late-entry riders, essentially anyone 40 years old and up who's looking to hit the road on two wheels. Author Philip Buonpastore, a motorcycle journalist and retired US Air Force photographer, helps readers gear up to get back on a motorcycle (or get on one for the first time). In Part 1, "Becoming a Motorcyclist," Buonpastore discusses the basics of buying the right bike, gear, and equipment and getting the bike up to speed. The book continues with a good overview of learning to ride, the importance of taking a road course, venturing out on the first ride, and extending rides to long-distance jaunts. Throughout Part 1 are sidebars by riding- safety instructor and expert Walt Fulton, offering sound advice on safety precautions and execution for every leg of the new and returning rider's journey. The author emphasizes what older riders should be aware of and which factors can affect their rides. Adding lots of great firsthand advice are humorous and helpful stories collected by the author and related by returning riders at various ages, from their late 30s to 60s. In Part 2, Buonpastore shares five of his favorite travelogues covering his long-distance tours around the US, from the American South to the west coasts. This section is illustrated by over 100 of the author's breathtaking photographs of the various locations he toured on his bike. The foreword to the book is provided by best-selling motorcycle author David Hough (author of I-5 Press's *Proficient Motorcycling and Mastering the Ride*). Hough writes, "If you're getting into today's motorcycling at an age your doctor would describe as 'middle aged' or 'senior,' do you yourself a clever favor and read Phil's book."

This best-selling book is also “#1 book in motorcycle safety” (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider’s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider’s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called “Cornering Habits” is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough’s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough’s voice in his head takes an unnecessary risk with his own life. *Proficient Motorcycling* takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it’s road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or “blind” truck drivers. The book offers the kind of first-hand experience that can literally save riders’ lives, as illustrated in the chapters “Booby Traps” and “Special Situations,” which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, “Sharing the Ride,” is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

Meet Rupert, a curious and fun-loving squirrel. When a family moves into the house near his tree, Rupert hopes they will become his friends. As the Man with the Bow Tie, Mrs. Maggie and the children are busy unpacking, danger suddenly lurks in the yard. Can Rupert save them? Or will the Man with the Bow Tie shoo Rupert away? This is the first of the 10-book Rupert's Adventures series birthed as an idea from my grandchildren. After my youngest son Matthew died, I needed a healthy outlet to keep me grounded. My wife and I teach our five grandchildren to love, honor and respect each other, to value diversity and to influence others through positive character traits. This series has a subtle focus on family values and positive character traits. I have chosen the pen name Lord Fritz III. As Lord Fritz, I take on the character of a goofy guy with Rupert on his shoulder. Find out more about us at [EasternReachBooks.com](#)

*Live to Ride* is pure adrenaline—a full-throttle exploration of motorcycles that pushes to the limit, with heart-pounding accounts of riding the greatest bikes of all time, all over the world. “Live to ride, ride to live.” For many motorcycle riders, these words express life’s guiding principle. Just take a look at the patch emblazoned on the jackets of legions of riders. Whether they’re roaring down an empty highway on two wheels at an insane speed,

hopping on for a few mind-boggling loops of motocross, joining in the “rolling thunder” of a veritable outlaw motorcycle club, or just cruising on a Harley on a Sunday afternoon, motorcyclists of all stripes share a common love of the freedom that is riding. Wayne Johnson, a lifelong motorcycle-lover and acclaimed writer, takes us around the globe and onto the terrain where the most extreme, thrilling forms of riding happen. Johnson shows where it all began more than a hundred years ago when the first motorcycle evolved from the bicycle and lands us on the track today with some of the world’s highest-paid athletes— professional motorcycle road racers. From there we go inside radically different competitions like the vertigo-inspiring “Widowmaker Hillclimb” and the fastest land racing on the planet at the Bonneville Salt Flats. Johnson also offers an inside look at the legendarily secretive culture of biker clubs with firsthand accounts of his own wild rides with an outlaw club. In every one of these venues, you aren't just passing through as an observer—you are on a bike, racing across new and undiscovered country, the horizon your only destination. If you have ever wondered what it's like to climb on a motorcycle and feel its engine roar to life, or have actually done it and felt the rush of flying off into the wild blue yonder, or have simply been intrigued by this iconic part of American culture and history, hold on tight for this irresistible, one-of-a-kind journey into motorcycling.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
