Conventional wisdom says that integration into the global marketplace

tends to weaken the power of traditional faith in developing countries. But, as Meera Nanda argues in this path-breaking book, this is hardly the case in today's India. Against expectations of growing secularism, India has instead seen a remarkable intertwining of Hinduism and neoliberal ideology, spurred on by a growing capitalist class. It is this "State-Temple-Corporate Complex," she claims, that now wields decisive political and economic power, and provides ideological cover for the dismantling of the Nehru-era state-dominated economy. According to this new logic, India's rapid economic growth is attributable to a special "Hindu mind," and it is what separates the nation's Hindu population from Muslims and others deemed to be "anti-modern." As a

result, Hindu institutions are replacing public ones, and the Hindu "revival" itself has become big business, a major source of capital accumulation. Nanda explores the roots of this development and its possible future, as well as the struggle for secularism and socialism in the world's second-most populous country.

Although no less an authority than

Joseph A. Schumpeter proclaimed that Antonio Serra was the world's first economist, he remains something of a dark horse of economic historiography. Nearly nothing is known about Serra except that he wrote and died in jail, and his Short Treatise is so rare that only nine original copies are known to have survived the ravages of time. What, then, can a book written nearly four centuries ago tell us about the problems we now face? Serra's key insight, studying the economies of Venice and Naples, was that wealth was not the result of climate or providence but of policies and strategies for competitively developing some economic activities rather than others, particularly manufactures, subject to increasing returns to scale and a large division of

labour. Through a very systematic taxonomy of economic life, Serra then went on from this insight to theorize the causes of the wealth of nations and the measures through which a weak, dependent economy could achieve worldly melioration. At a time when leading economists return to biological explanations for the failure of their theories, the Short Treatise can remind us that there are elements of history which numbers and graphs cannot convey or encompass, and that there are less despondent lessons to be learned from our past. Serra's remarkable treatise is introduced by a lengthy and illuminating study of his historical context and legacy for the theoretical and cultural history of economics and for the economic strategies of nations.

Perspectives on International Relations:

Power, Institutions, and Ideas shows students new to the field how theories (perspectives) of international affairs—realism, liberalism, constructivism (identity), and critical theory—play a decisive role in explaining every-day debates about world affairs. Why, for example, do politicians and political scientists disagree about the causes of the ongoing conflict in Syria, even though they all have the same facts? Or, why do policymakers disagree about how to deal with North Korea when they are all equally well informed? The new Sixth Edition of this best-seller includes updates on Brexit, the rise of Donald Trump and other populist leaders, and continuing developments for ISIS, Syria, and Russia.

Sociological Essays John Benjamins Publishing Company

The essays in this volume present an analytical appraisal of public institutions in India. The purpose here is not just to

give a history of these institutions but to ask what explains their performance and what might be learnt from their experience. It assesses the manner in which they assist, thwart, manipulate, and subvert each other. The aim is to provide a complex account of the modalities through which state power is exercised and policy enacted. This study contributes to debates on institutional change and reform that are currently underway in India by bringing more analytical rigour and enlarging the parameters of the debate. These debates are particularly important given that Indian economy and society have changed profoundly in the last decade and a half. Much of the discussion is on how state institutions like the civil service, the courts, the police,

parliament, and regulatory institutions will need to be reconfigured to better adapt to changing circumstances.
