House & Garden's Second Book of Houses Craftsman Book Company
 Houses of the future will be smaller, more energy-efficient, and better suited to their environments. And intelligent design solutions can help expand the scope and livability of a compact house, making it elegant as well as practical. In 1990, Storey Communications sponsored the Compact House Design Competition, a juried contest open to architects, designers, and architecture students. From the numerous entries that were received from all over North America, professional architects Don Metz and Peter Woerner selected the best and most innovative designs to include in *New Compact House Designs*. Although the top three designs received cash awards, all 27 of the designs in this book are winners -- and each design illustrates a classic or contemporary approach to living gracefully in a small house. The basic guidelines were clear: design a single-family house with a minimum of two bedrooms whose gross floor area does not exceed 1,250 square feet. Aside from these stipulations, almost anything went, and the broad spectrum of designs included in this book reflects the geographical and stylistic diversity of the winning entries -- from a classic New England farmhouse to a sophisticated postmodern design, from a New Mexican desert hacienda to a fanciful house with Elizabethan overtones. The perfect idea book for current and future homeowners, *New Compact House Designs* will also appeal to anyone interested in architectural design. Each entry included in the book features a site drawing, floor plans, elevation and section drawings, judges' comments, and a complete description of the project. Addresses for architects and designers are also provided for readers interested in obtaining scale plans or more information on any particular house.

Working Drawings Handbook focuses on the principles, styles, methodologies, and approaches involved in drawings. The book first takes a look at the structure of information, types of drawing, and draftsmanship. Discussions focus on dimensioning, drawing conventions, techniques, materials, drawing reproduction, location drawing, component and sub-component drawings, assembly drawing, schedule, pictorial views, and structure of working drawings. The manuscript then ponders on working drawing management and other methods. Topics include planning the set, drawing register, drawing office programming, and introducing new methods. Building elements and external features, conventions for doors and windows, symbols indicating materials, electrical, telecommunications, and fire symbols, and non-active lines and symbols are also discussed. The book is a fine reference for draftsmen and researchers interested in studying the elements of drawing.

Southern Homes and Plan Books showcases the architectural legacy and design philosophy of Leila Ross Wilburn (1885–1967), a legacy that includes hundreds of houses in a variety of popular house styles, from bungalows to ranch houses, built using Wilburn's plan books during the first six decades of the twentieth century. Wilburn opened her own firm in Atlanta in 1908 and practiced until her death in 1967. She published nine plan books that offered mail order house designs to contractors, builders, and prospective homeowners and allowed them the ease of choosing a preconceived design and construction plan. Sarah J. Boykin and Susan M. Hunter provide a survey of the southern homes built from Wilburn's plan books, examining Wilburn's architectural legacy and her achievements as a plan book architect. The book provides beautiful photographs of houses built from her plans, along with illustrations from the plan books themselves and other related documents from the time. Readers can thus see how her designs were realized as individual houses and also how they influenced the development of some of the Atlanta area's beloved historical neighborhoods, most notably Druid Hills, Morningside, Virginia-Highland, and Candler Park, as well as the McDonough-Adams-Kings Highway (MAK) Historic District in Decatur. Today, Wilburn's houses are enjoyed as appealing, historic homes and represent some of the richest examples of southern vernacular architecture to emerge from the plan book tradition.

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 edition. Excerpt: ... A GENERAL DESCRIPTION OF THE PLANS TO design a small country house possessing artistic and economic features, the construction of which may be accomplished for a minimum amount, is not among the simplest problems of the architectural profession. The most satisfactory solutions are arrived at by a process of elimination, resulting in a compact plan possessing the essential requirements of the average home-builder, and arranged in such a manner that the

total area is proportionately divided to best suit the uses for which each unit of the plan is intended. The houses shown on the following pages have been carefully designed to meet the requirements of the average family desiring a house of moderate size and pleasing appearance. They are taken from the actual working drawings or from houses already erected. The aim of the authors has been to emphasize the really essential features and eliminate all that might be considered superfluous or not consistent in a house of moderate cost. Simplicity of plan and exterior treatment means economy but not necessarily ugliness. The success of an architectural design, in a building of any description depends principally upon its proportion, scale and fenestration, and no amount of elaboration can atone for a poorly proportioned building. Bearing all this in mind, we have planned our houses, knowing that the people who will live in them will prefer to have their rooms as large as possible for the price they pay and to have the construction and materials of the best throughout. We know that buildings cost so much per cubic foot or square foot of ground area. When we attempt to build a small or medium-sized house with extra rooms, such as libraries, reception rooms, large halls or billiard-rooms, we 10 A...
