For over 2000 years, philosophy has been our best guide to the experience of being human, and the true nature of reality. From Aristotle, Plato, Epicurus, Confucius, Cicero and Heraclitus in ancient times to 17th century rationalists Descartes, Leibniz and Spinoza, from 20th-century greats Jean-Paul Sartre, Jean Baudrillard and Simone de Beauvoir to contemporary thinkers Michael Sandel, Peter Singer and Slavoj Zizek, 50 Philosophy Classics explores key writings that have shaped the discipline and had an impact on the real world. This is the thinking person's guide to a uniquely powerful tool for opening our minds and helping us view the world. It synthesises the 50 greatest books ever written, distilling hundreds of ideas from across the centuries with insightful commentary, key quotes and biographical information on the authors. The revised edition will:

include 7 new contemporary or timely classics such as Judith Butler's Gender Trouble, Michael Sandel's The Tyranny of Merit, Isaiah Berlin's The Hedgehog and the Fox and Mary Midgely's Myths We Live By. · include a reader code to access a free pack of downloadable bonus material · have a revised introduction to reflect on the current relevance of philosophy today with topical themes to have emerged in the 9 years since the last edition was written. · have some of the less relevant titles removed "50 Philosophy Classics is an impressively wide-ranging compendium of nutshell clarity. The Daily Stoic Nicholas Brealey

This book is a reprint of the dissertation that won the 2009 Prize of the Pontifical Academies. The analogy of names is not one of those topics that is important because it is a grand conclusion to intensive philosophical or theological research. Rather, analogy is important because it stands, explicitly or implicitly, at the very beginning of all work in philosophy and theology. For centuries, the thoughts of St. Thomas on analogy, which are found in texts scattered throughout his works, were considered to have been aptly grouped and articulated by Cardinal Cajetan. Most works on analogy in Aquinas since the time of Cajetan merely repeat what Cajetan said. This book approaches the question afresh, returning to the works of St. Thomas in order to find what he thought was the fundamental meaning of the word 'analogy.' Not only are several misconceptions about analogy cleared up, but a description is given of the way that God is first in our thoughts, as well as in reality.

The Philosophy Book Simon and Schuster

Classical Philosophy is the first of a series of books in which Peter Adamson aims ultimately to present a complete history of philosophy, more thoroughly but also more enjoyably than ever before. In short, lively chapters, based on the popular History of Philosophy podcast, he offers an accessible, humorous, and detailed look at the emergence of philosophy with the Presocratics, the probing questions of Socrates, and the first full flowering of philosophy with the dialogues of Plato and the treatises of Aristotle. The story is told 'without any gaps', discussing not only such major figures but also less commonly discussed topics like the Hippocratic Corpus, the Platonic Academy, and the role of women in ancient philosophy. Within the thought of Plato and Aristotle, the reader will find in-depth introductions to major works, such as the Republic and the Nicomachean Ethics, which are treated in detail that is unusual in an introduction to ancient philosophy. Adamson looks at fascinating but less frequently read Platonic dialogues like the Charmides and Cratylus, and Aristotle's ideas in zoology and poetics. This full coverage allows him to tackle ancient discussions in all areas of philosophy, including epistemology, metaphysics, philosophy of language,

philosophy of science, ethics and politics. Attention is also given to the historical and literary context of classical philosophy, with exploration of how early Greek cosmology responded to the poets Homer and Hesiod, how Socrates was presented by the comic playwright Aristophanes and the historian Xenophon, and how events in Greek history may have influenced Plato's thought. This is a new kind of history which will bring philosophy to life for all readers, including those coming to the subject for the first time.

What can the film Hoosiers teach us about the meaning of life? How can ancient Eastern wisdom traditions, such as Taoism and Zen Buddhism, improve our jump-shots? What can the "Zen Master" (Phil Jackson) and the "Big Aristotle" (Shaquille O'Neal) teach us about sustained excellence and success? Is women's basketball "better" basketball? How, ethically, should one deal with a strategic cheater in pickup basketball? With NBA and NCAA team rosters constantly changing, what does it mean to play for the "same team"? What can coaching legends Dean Smith, Rick Pitino, Pat Summitt, and Mike Krzyzewski teach us about character, achievement, and competition? What makes basketball such a beautiful game to watch and play? Basketball is now the most popular team sport in the United States; each year, more than 50 million Americans attend college and pro basketball games. When Dr. James Naismith, the inventor of basketball, first nailed two peach baskets at the opposite ends of a Springfield, Massachusetts, gym in 1891, he had little idea of how thoroughly the game would shape American—and international—culture. Hoops superstars such as Michael Jordan, LeBron James, and Yao Ming are now instantly recognized celebrities all across the planet. So what can a group of philosophers add to the understanding of basketball? It is a relatively simple game, but as Kant and Dennis Rodman liked to say, appearances can be deceiving. Coach Phil Jackson actively uses philosophy to improve player performance and to motivate and inspire his team and his fellow coaches, both on and off the court. Jackson has integrated philosophy into his coaching and his personal life so thoroughly that it is often difficult to distinguish his role as a basketball coach from his role as a philosophical guide and mentor to his players. In Basketball and Philosophy, a Dream Team of twenty-six basketball fans, most of whom also happen to be philosophers, proves that basketball is the thinking person's sport. They look at what happens when the Tao meets the hardwood as they explore the teamwork, patience, selflessness, and balanced and harmonious action that make up the art of playing basketball.
