A History of Geometrical Methods Faber & Faber
 Making Connections teaches an extensive range of reading skills and strategies in order to prepare students for college reading. The current series takes students from a low-intermediate to a low-advanced level of academic reading skill proficiency. In December 2015 two new levels - high beginning and advanced - will be added to the series. The series contains a strong focus on vocabulary-building, including teaching words from the Academic Word List. It emphasizes critical thinking and increased reading speed. The series has a unique unit structure. At the outset of each unit, students are presented with and practice key reading and vocabulary-building skills. As students read the texts following these sections, they apply these skills by completing exercises in boxes in the margins of the readings, so that students literally have to apply the newly-learned skills 'while reading.'

 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' - 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' - and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can - and must - be rediscovered with every age.' - Irish Times

 Do your sentences sag? Could your paragraphs use a pick-me-up? If so, The Writer's Diet is for you! It's a short, sharp introduction to great writing that will help you energize your prose and boost your verbal fitness. Helen Sword dispenses with excessive explanations and overwrought analysis. Instead, she offers an easy-to-follow set of writing principles: use active verbs whenever

possible; favor concrete language over vague abstractions; avoid long strings of prepositional phrases; employ adjectives and adverbs only when they contribute something new to the meaning of a sentence; and reduce your dependence on four pernicious "waste words": it, this, that, and there. Sword then shows the rules in action through examples from William Shakespeare, Emily Dickinson, Martin Luther King Jr., John McPhee, A. S. Byatt, Richard Dawkins, Alison Gopnik, and many more. A writing fitness test encourages you to assess your own writing and get immediate advice on addressing problem areas. While The Writer's Diet is as sleek and concise as the writing ideals contained within, this slim volume packs a powerful punch. With Sword's coaching writers of all levels can strengthen and tone their sentences with the stroke of a pen or the click of a mouse. As with any fitness routine, adhering to the rules requires energy and vigilance. The results, however, will speak for themselves.

Linguists routinely emphasise the primacy of speech over writing. Yet, most linguists have analysed spoken language, as well as language in general, applying theories and methods that are best suited for written language. Accordingly, there is an extensive 'written language bias' in traditional and present day linguistics and other language sciences. In this book, this point is argued with rich and convincing evidence from virtually all fields of linguistics.

Based on extensive research, Grammar and Beyond ensures that students study accurate information about grammar and apply it in their own speech and writing. This is the first half of Student's Book, Level 2. The Student's Book is the main component of Grammar and Beyond. In each unit, students study the grammar in a realistic text and through charts and notes informed by a billion-word corpus of authentic language. The exercises provide practice in reading, writing, listening, and speaking, making this a complete course. Students learn to avoid common mistakes, based on an extensive corpus of learner language. Each unit concludes with a Grammar for Writing section, in which students apply the grammar in an extended writing task.

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are

influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

[Understanding the Paragraph and Paragraphing](#) Cambridge University Press

Understanding the Paragraph and Paragraphing is a work of wide-ranging and in-depth scholarship on the nature of the paragraph and the factors involved in making paragraphing decisions when constructing written text. Its comprehensive scope includes discussion on the origin of the paragraph and its nature as explored in centuries past and in recent work in discourse analysis and corpus linguistics, with implications drawn for pedagogy and future research. McGee profiles the work of key figures who helped to set traditional notions of the paragraph, and then turns to recent and contemporary empirical research and theorizing, including his own, on paragraph structure and on writing process activity related to paragraphing decisions. The extensive review and close analysis of sources, combined with the author's knowledge of research traditions and methodologies, provides a strong foundation for McGee's probing study of the paragraph and the resulting enlightened understandings of it that the book provides. Given that what the general public and indeed most teachers know about paragraphs and paragraphing does not represent actual paragraph structure or paragraphing practice, the pedagogical guidance which the author provides based on a thorough review of existing research makes this an especially useful book.

In grade school, she always had her nose in a book. In junior high, the other kids thought she was weird, because she actually liked reading those dusty old novels in literature class. All through high school, Goldilocks dreamed of writing a book of her own someday. But when she went to college, her parents persuaded her to study something practical. Goldilocks hated practical, and secretly she kept reading novels. But she was a very obedient girl, so she did what her parents told her. She got a very practical degree in marketing. After college, she got a job that bored her to tears—but at least it was practical. Then she got married, and within a few years, she had two children, a girl and then a boy. She quit her job to devote full time to them. As the children grew, Goldilocks took great joy in introducing them to the stories she had loved as a child. When her son went off to kindergarten, Goldilocks thought about looking for a job. But her resume now had a seven-year hole in it, and her practical skills were long out of date. The only jobs Goldilocks could qualify for were minimum wage. She suddenly realized that being practical had made her horribly unhappy. On a whim, Goldilocks decided to do the one thing she had always wanted more than anything else—she was finally going to write a novel. She didn't care if it was impractical. She didn't care if nobody would ever read her novel. She was going to do it just because she wanted to. For the first time in years, she was going to do something just for herself. And nobody was going to stop her.

DIV In her entertaining and edifying New York Times bestseller, acclaimed author Francine Prose invites you to sit by her side and take a guided tour of the tools and tricks of the masters to discover why their work has endured. Written with passion, humour and wisdom, *Reading Like a Writer* will inspire readers to return to literature with a fresh eye and an eager heart - to take pleasure in the long and magnificent sentences of Philip Roth and the breathtaking paragraphs of Isaac Babel; to look to John le Carré for a lesson in how to advance plot through dialogue and to Flannery O'Connor for the cunning use of the telling detail; to be inspired by Emily Brontë's structural nuance and Charles Dickens's deceptively simple narrative techniques. Most importantly, Prose cautions readers to slow down and pay attention to words, the raw material out of which all literature is crafted, and reminds us that good writing comes out of good reading. /div
