Tanker Familiarization IMO Publishing

This book presents selected contributions to the Pan-American Congress of Naval Engineering, Maritime Transport and Port Engineering (COPINAVAL), which is in its twenty-fifth edition and has become a reference event for the global maritime and port sector, attracting more and more participants from different

countries. The 2017 congress was held in Panama City, Panama, bringing together a select group of scientists, entrepreneurs, academics and professionals to discuss the latest technological advances in the maritime industry.

Port state control IMO Publishing

This model course is intended to provide the knowledge required to enable personnel without designated security duties in connection with a Ship Security Plan (SSP) to enhance ship security in accordance with the requirements of chapter XI-2 of SOLAS 74 as amended, the ISPS Code, and section A-VI/6-1 of the

STCW Code, as amended. Those who successfully complete this course should achieve the required standard of competence enabling them to contribute to the enhancement of maritime security through heightened awareness and the ability to recognize security threats and to respond appropriately.

This volume collects the papers presented at the 2005 Annual General Assembly and Conference of the International Association of Maritime Universities (IAMU), which was held in Malmo, Sweden from 24 to 26 October 2005, and hosted by the World Maritime University. Section 1 presents interim and final reports on several research projects funded by IAMU. Section 2 presents a broad range of academic papers on the theme of maritime Security and MET. These range from the challenges faced by MET institutions worldwide in incorporating the new topic of maritime security into their syllabi, to the economic costs of the new maritime security regime to the shipping industry and to ports. Other topics are also covered, including the technical means of monitoring the movements of ships, and the social implications for seafarers on board ships. Section 3 includes papers on a variety of current MET issues, such as bridge resource management, quality management in MET, careers at sea, and ship handling and marine engineering simulators.

Security Enhanced Applications for Information Systems WIT Press

Every day, more users access services and electronically transmit information which is usually disseminated over insecure networks and processed by websites and databases, which lack proper security protection mechanisms and tools. This may have an impact on both the users' trust as well as the reputation of the system's stakeholders. Designing and implementing security enhanced systems is of vital importance. Therefore, this book aims to present a number of innovative security enhanced applications. It is titled "Security Enhanced Applications for Information Systems" and includes 11 chapters. This book is a quality guide for teaching purposes as well as for young researchers since it presents leading innovative contributions on security enhanced applications on various Information Systems. It involves cases based on the standalone, network and Cloud environments.

Federal Register Maritime Institute of Malaysia (MIMA)

The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many aspects of the navigational safety from various different points of view. Topics presented and discussed at the Symposium were: navigation, safety at sea, sea transportation, education of navigators and simulator-based training, sea traffic engineering, ship's manoeuvrability, integrated systems, electronic charts systems, satellite, radio-navigation and anti-collision systems and many others. This book is part of a series of four volumes and provides an overview of advances in Marine Navigation and is addressed to scientists and professionals involved in research

and development of navigation, safety of navigation and sea transportation.

Maritime Work Law Fundamentals: Responsible

Springer Science & Business Media

Introduction to Container Ship Operations and Onboard Safety is an introduction for students and professionals involved in the maritime industry. It provides an overview of the merchant navy from its beginnings to the present day, entry and training requirements, shipboard hierarchy and roles and responsibilities, shipboard safety organisation, inductions and new crew member familiarisation, safe means of access to enclosed spaces, general housekeeping, risk assessment and risk management. In addition, it examines specific hazardous activities such as cargo loading and unloading, drydocking, drills, and actions to take in the event of an emergency. This textbook provides a concise overview of core concepts and practices in the maritime industry that is appropriate for the cadet, experienced seafarer, industry professional, and the general maritime enthusiast.

Introduction to Container Ship Operations and Onboard Safety
IMO Publishing

The importance of international maritime labour law - both as a component of international maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years.

Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the International Labour Organization, the

International Transport Workers' Federation, and the German Shipowners' Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals: Responsible Shipowners, Reliable Seafarers. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders. Institutionally, the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the International Labour Organization. It has to be said that whilst this effort achieved great progress, it has led to a haphazard, plethora of legal instruments.
