Agroforestry is recognized as a sustainable land-use

management in the tropics, as it provides environmental-friendly ecosystems; it also provides people with their every day need for food and cash. Since the recognition of agroforestry as a science, curricula have been developed for agroforestry programs for undergraduate and graduate trainings in Universities. Therefore, there is an urgent need to develop and make available educational material. This textbook strives to provide up-to-date information on tropical agroforestry to serve as educational material in the tropical context. The authoritative textbook of Nair (1993) on agroforestry was published 18 years ago, and before the advent of tree domestication, an important agroforestry practice today. In addition, many other research activities, such as carbon sequestration and integrated pest management, have been included in the agroforestry agenda. This textbook is intended for agroforestry students, teachers, and practitioners.

"Only a small community has concentrated on general intelligence. No one has tried to make a thinking machine . . . The bottom line is that we really haven't progressed too far toward a truly intelligent machine. We have collections of dumb specialists in small domains; the true majesty of general intelligence still awaits our attack. . . . We have got to get back to the deepest questions of AI and general intelligence. . ." -Marvin Minsky as interviewed in Hal's Legacy, edited by David Stork, 2000. Our goal in creating this edited volume has been to fill an apparent gap in the scientific literature, by providing a coherent presentation of a body of contemporary research that, in spite of

its integral importance, has hitherto kept a very low profile within the scientific and intellectual community. This body of work has not been given a name before; in this book we christen it "Artificial General Intelligence" (AGI). What distinguishes AGI work from run-of-the-mill "artificial intelligence" research is that it is explicitly focused on engineering general intelligence in the short term. We have been active researchers in the AGI field for many years, and it has been a pleasure to gather together papers from our colleagues working on related ideas from their own perspectives. In the Introduction we give a conceptual overview of the AGI field, and also summarize and interrelate the key ideas of the papers in the subsequent chapters.

A beautifully illustrated full-color history of mapmaking across centuries -- a must-read for history buffs and armchair travelers. Theater of the World offers a fascinating history of mapmaking, using the visual representation of the world through time to tell a new story about world history and the men who made it. Thomas Reinertsen Berg takes us all the way from the mysterious symbols of the Stone Age to Google Earth, exploring how the ability to envision what the world looked like developed hand in hand with worldwide exploration. Along the way, we meet visionary geographers and heroic explorers along with other unknown heroes of the map-making world, both ancient and modern. And the stunning visual material allows us to witness the extraordinary breadth of this history with our own eyes.

Descriptive grammars are our main vehicle for documenting and analysing the linguistic structure of the world's 6,000 languages. They bring together, in one place, a coherent treatment of how the whole language works, and therefore form the primary source of information on a given language, consulted by a wide range of users: areal specialists, typologists, theoreticians of any part of language (syntax, morphology, phonology, historical linguistics etc.), and members of the speech communities concerned. The writing of a descriptive grammar is a major intellectual challenge, that calls on the grammarian to balance a respect for the language's distinctive genius with an awareness of how other languages work, to combine rigour with readability, to depict structural regularities while respecting a corpus of real material, and to represent something of the native speaker's competence while recognising the variation inherent in any speech community. Despite a recent surge of awareness of the need to document little-known languages, there is no book that focusses on the manifold issues that face the author of a descriptive grammar. This volume brings together contributors who approach the problem from a range of angles. Most have written

descriptive grammars themselves, but others represent different types of reader. Among the topics they address are: overall issues of grammar design, the complementary roles of outsider and native speaker grammarians, the balance between grammar and lexicon, cross-linguistic comparability, the role of explanation in grammatical description, the interplay of theory and a range of fieldwork methods in language description, the challenges of describing languages in their cultural and historical context, and the tensions between linguistic particularity, established practice of particular schools of linguistic description and the need for a universally commensurable analytic framework. This book will renew the field of grammaticography, addressing a multiple readership of descriptive linguists, typologists, and formal linguists, by bringing together a range of distinguished practitioners from around the world to address these questions. *West Highland Way* Springer Science & Business Media "Polished, poignant... an inspiring story of true love."—Entertainment Weekly A BEST BOOK OF 2019, NPR's Book Concierge SHORTLISTED FOR THE COSTA BOOK AWARD OVER 400,000 COPIES SOLD WORLDWIDE The true story of a couple who lost everything and embarked on a transformative journey walking the South West Coast Path in England Just days after Raynor Winn learns that Moth, her husband of thirty-two years, is terminally ill, their house and farm are taken away, along with their livelihood. With nothing left and little time, they make the brave and impulsive decision to walk the 630 miles of the sea-swept South West Coast Path, from Somerset to Dorset, through Devon and Cornwall. Carrying only the essentials for survival on their backs, they live wild in the ancient, weathered landscape of

cliffs, sea, and sky. Yet through every step, every encounter, and every test along the way, their walk becomes a remarkable and life-affirming journey. Powerfully written and unflinchingly honest, *The Salt Path* is ultimately a portrayal of home—how it can be lost, rebuilt, and rediscovered in the most unexpected ways.

Wilderness Survival For Dummies Harper Collins

This guidebook describes the GR221, a 140km (87 mile) long-distance trail through northwestern Mallorca, from Port d'Andratx to Pollença. Also known as the 'Ruta de Pedra en Sec' ('the Drystone Route'), the GR221 is a celebration of Mallorca's limestone heritage, taking in many historic drystone structures as it traverses the rocky peaks of the Serra de Tramuntana. Following old stone-paved paths and mule trails, it showcases the region's beautiful landscape of mountains, forests and cultivated terraces, as well as its spectacular coastline. The GR221 can be walked in 1-2 weeks, although the guide also covers 3 alternative

start-points and 3 alternative finishes, which would allow for a shorter trek. The main route is presented in 10 stages of 8.5-20.5km (5-13 miles), with a handful of optional detours to bag neighbouring summits. Detailed route description is accompanied by 1:25,000 mapping and inspirational photography, plus a wealth of information on local points of interest. Accommodation and travel are also thoroughly covered: the trail boasts good transport links and plentiful facilities on route, with accommodation in welcoming mountain villages and the occasional 'refugi'. A comprehensive introduction offers the opportunity to discover more about the region's diverse plants and wildlife and unique history and culture, and an English-Spanish-Catalan glossary can be found in the appendix. With a favourable climate and stunning scenery, the Serra de Tramuntana has much to tempt the walker. The GR221 Drystone Route represents an ideal way to explore this fascinating World Heritage Site.
